## DETAILED ACTION

### *Election/Restrictions*

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-6, 11-23, 27-28, drawn to a microwave oven, classified in class 219, subclass 720.
  - II. Claims 7-10 and 24-26, drawn to a method of controlling a microwave oven, classified in class 219, subclass 702.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions of Group I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case, the apparatus as claimed can be used to practice another and materially different process, such as, for example: the apparatus as claimed in Group I can be use to practice another and materially different process such as the method of controlling microwave oven as claim in claims 7-10 and claims 24-28, or the process as claimed in Group II can be practiced by another materially different apparatus such as the apparatus as claimed in claims 11-6 or the apparatuses as claimed in claims 11, 12, 13, 15-23, 27 and 28.

Art Unit: 3742

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

5. A telephone call was made to Mr. Gene M. Gamer II on April 5, 2004 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
